True or false?

➳ **Hawkfrost has SkyClan, ThunderClan, and Kittypet blood.**

~ Floriah

★7.2★

Answer:

➳ True, Hawkfrost's mother (Sasha) is a kittypet, while his father (Tigerstar) has SkyClan and ThunderClan blood.

Ironic how Tigerstar hated half-blood/clan cats, yet his son is one.

True or false?

➳ **Squirrelflight and Bramblestar are related.**

~ Floriah

★ 8 . 2 ★

Answer:

➳ True, how? Let's just go way back!

Redtail > Sandstorm > Squirrelflight (all related in blood)

Leopardfoot > Tigerstar > Bramblestar (all related in blood)

How is this connected you may ask? Well... Redtail and Leopardfoot are siblings. Now that's awkward...

But I guess it's not an error, in-breeding is very common in wild cats. They need (or want to, I blame hormones) to reproduce. Eventually they will all turn out related in generations after generations, because obviously there won't be random cats from different blood-line popping up saying "Hi (bump bump bump) wanna be mates?"

Of course unless you're special like Firestar and Sasha (and other loners/rogues/kittypet) that got a chance to breed with a clan cat.

Heh. Either way, I was quite surprised myself.
